

Practice Problems List-15 (Strings)

You cannot use any library function under <string.h> to solve the problems

1. Write a C program to input a word and print each of the characters separated by a space.

Sample Input: Olid

Expected Output: O l i d

2. Write a C program to input a sentence and print each of the characters in a new line.

Sample Input: Fuad

Expected Output:

F

u

a

d

3. Write a program in C to find the length of a string.

Sample Input: Monwar

Expected Output: 6

4. Write a program in C to print a string in reverse order.

Sample Input: Ahad

Expected Output: dahA

5. Write a C program to convert a string to uppercase.

Sample Input: Mahdi

Expected Output: MAHDI

6. Write a C program to convert a string to lowercase.

Sample Input: SumaiYa

Expected Output: sumaiya

7. Write a C program to toggle the case of each character of a string. That is, if a character is lowercase, convert it to uppercase, and vice-versa.

Sample Input: NafiSa

Expected Output: nAFIsA

8. Write a C program to find the first occurrence of a character in a given string.

Sample Input: abida a

Expected Output: 0

9. Write a C program to find the last occurrence of a character in a given string.

Sample Input: Tasnia a

Expected Output : 5

10. Write a program in C to count the total number of vowels, consonants, and other characters in a string.

11. Write a C program and count the frequency of each letter.

Sample input: nayeem

Sample output:

a : 1

e : 2

m : 1

n : 1

y : 1

12. Write a C program to print the majority character in a given string.

Sample Input: iffaf

Expected Output: f

13. Write a C program to copy a string to another string.

14. Write a C program to input a string and *make a new string* by adding an asterisk '*' at both ends of the original string.

Sample Input: olid

Expected Output: *olid*

15. Write a C program to input a string and copy its vowels and consonants in separate strings.

Sample Input: tanvirmahtab

Expected Output: aiaa tnvrmtb

16. Write a program in C to remove characters from a string except alphabets and store it to another string.

Sample Input: N@yeem-sarwar:123

Expected Output: Nyeemsarwar

17. Write a program in C to remove the occurrences of a specific character from a string and store it to another string.

Sample Input: worldwideweb w

Expected Output: orldideeb

18. Write a C program to copy a string in reverse to another array.

19. Write a C program to reverse a string without using another array.

20. Take input two strings and compare if they are equal or not. If they are, print EQUAL. Otherwise, print NOT EQUAL.

21. Take input two strings and compare the two strings. If they are equal, print 0. Else, if the first one is lexicographically greater, print 1. If the second one is greater, print -1.

22. Write a C program to check if a string is palindrome or not.

23. Take two strings as inputs and concatenate the two strings.

Sample Input: hello world

Expected Output: helloworld

24. Take input an integer as a string, then convert the string to integer, store it to an integer variable, and print it.

25. Take input a binary number as a string and convert it to an integer, store it to an integer variable, and print it.
