

Practice Problems List-3 (if-else)

1. Take an integer input and check whether the number is zero or not. If it is zero, print **zero** in the output, otherwise print nothing.
2. Take an integer input and check whether the number is negative or non-negative.
3. Take two integers a and b as input and check whether they are equal or not.
4. Take an integer input and check whether a number is even or odd.
5. Take an integer input and check if the number is divisible by 3.
6. Take an integer input and check if the number is a multiple of both 7 and 8.
7. Take an integer input and check if both 5 and 6 are factors of the number or not.
8. Take the age of a person as input and see if he/she is eligible to vote or not.
[A person must be 18 to vote.]
9. Print the bigger one among two integers. If the two numbers are equal, print any one.
10. Take an integer as input and print **Positive**, **Negative** or **Zero** depending on the value of the integer.
11. Take an English letter as input and check whether it is a vowel or a consonant.
12. Check whether a character is an alphabet or not.
13. Check whether a character is an alphabet, digit, or special character.
14. Take an English letter as input and check whether it is uppercase or lowercase.
15. Take the age of a person as input (an integer) and his/her sex as a character (**M** for male or **F** for female). Check if he/she is eligible to marry.

[Women are eligible when they turn 18. For men, the age is 21.]

Sample Input: **20 M**
Output: **Not eligible**
